PANDECT Open Platform Lifts

Required lift rise - measurement between ground and upper level

Accessories & Options

Exit options

Straight through or adjacent (90°) option available.

Landing barrier arm

A barrier arm that protects the entrance when the lift is away from the upper landing. Opens and closes automatically by mechanical action.

Landing gate - upper

A gate that protects the entrance when the lift is away from the upper landing (included in Libero series). Electrically interlocked - manually opened & self-closing. Fully automatic option available.

Car gate and threshold ramp

A gate fixed to the car that protects the entrance when the lift is away from the lower landing (included in Libero series). Electrically interlocked - manually opened & self-closing (replaces the car barrier arm and retractable ramp). Fully automatic option available.

Call buttons - hardwired or wireless

Buttons positioned at the lower and upper landings used to summon the lift (included in Libero series).

Remote control - handheld

Allows the user to operate the lift with a handheld remote device - 2 handsets.

Secondary controls

Second set of directional lift controls positioned on the car wall.

Customisation

Vestner can customise lifts to suit the needs of clients or the location.
